

Faculty of Medicine in Rijeka

**Curriculum
2021/2022**

For course

**Anatomical Dissection of the Topographic Regions of
the Head and Neck**

Study program: **Medical Studies in English (R)** (elective)
University integrated undergraduate and graduate study
Department: **Department of Anatomy**
Course coordinator: **izv. prof. dr. sc. Arbanas Juraj, dr. med.**

Year of study: **5**
ECTS: **1.5**
Incentive ECTS: **0 (0.00%)**
Foreign language: **Possibility of teaching in a foreign language**

Course information:

The aim of the subject is to teach the students, through theoretical and practical learning, how to independently dissect given anatomical structures of the topographical regions of the head and neck of man. Independent dissection of the head and neck will give to the students much more detailed insight into the contents of the topographic regions, because during regular anatomy classes, the students learn from already done, dissected structures. In this way, they will better understand the relationship between individual structures in the topographic regions of the head and neck. For students of the 5th year, who are attending classes in surgery, otorhinolaryngology and maxillofacial surgery and stomatology, the anatomical dissection can only help to better recognize and locate certain anatomical structures that are of interest to them.

List of assigned reading:

Detton AJ. Grant's dissector 16th Edition. Wolters Kluwer, Philadelphia, USA, 2017.

Atlas of human anatomy

List of optional reading:

Tank PW. Grant's dissector 13th Edition. Lippincott Williams & Wilkins, Philadelphia, USA, 2005.

Lisowski FP. A Guide to Dissection of the Human Body 2nd Edition. World Scientific Publishing, Singapore, Indonesia, 2003.

Curriculum:

Student obligations:

Regular attendance and active participation in teaching and fulfilment of the given tasks in practicals.

Exam (exam taking, description of the written/oral/practical part of the exam, point distribution, grading criteria):

During the lecture, students' knowledge will be checked through the conversation

The results of practical work will be analysed, depending on the fulfilment of the technical criteria of the anatomical dissection and depending on the number of dissected, given anatomical structures.

Other notes (related to the course) important for students:

-

COURSE HOURS 2021/2022

Anatomical Dissection of the Topographic Regions of the Head and Neck
